1B+

Customer Conversations Analysed

CX teams are working hard. The system is working against them.

Siloed Channels

Agents juggle 4–6 disconnected tools daily. No unified view of the customer. Every interaction starts from zero.

Reactive Service

Brand crises surface after they go viral. Social complaints become PR fires before anyone notices.

Leadership Blind Spots

Reports take days to build. C-suite decisions are made on gut feel, week-old data, and incomplete context.

Result: Lost revenue, burnt-out agents, damaged brand reputation — and leadership flying blind.

One Platform. Unified Intelligence. All Channels.

We meet you where you are and take you to best-in-class.

Most brands start here

Best-in-class brands operate here

Most brands begin at Stage 1–2. Our fastest-growing customers reach Stages 6–8 within 12 months.

Platform Modules: Omni-Channel Ticketing · Social Listening · Social Analytics · Social CRM · Social Publishing · Quality Assessment · Dashboards & BI · Konnect AI+ · KRC

Everything Zendesk does. Plus the layer they never could.

Unified Inbox

Every channel: email, social, WhatsApp, web, calls. One queue. One agent view.

Smart Routing

Auto-assign by skill, language, SLA tier, or load. No manual triage.

SLA Management

Multi-level SLAs with breach alerts, escalation rules, and priority override.

Order & CRM Integration

Connect to any OMS, ERP, or CRM via APIs and webhooks. Full context on every ticket.

L1 / L2 Coordination

Structured escalation paths, internal notes, co-agent collaboration built in.

Real-Time Dashboards

Agent, supervisor, and leadership views. Resolution time, CSAT, backlog. All live.

WHY BRANDS SWITCH FROM ZENDESK / FRESHDESK

- Social channels (Instagram, X, WhatsApp) are native, not add-ons
- Email tickets with richer AI context
- Social Listening + Ticketing + Analytics on one login
- AI built in. No third-party bolt-on
- Seamless CTI integrations: Genesys, Exotel, Ozonetel and more, out of the box
- Single vendor for CX, social care, and executive reporting

Social care / listening is just the start. We close the loop on every conversation.

Listen Across Every Source

Track brand mentions, competitor activity, industry conversations, and crisis signals across 30+ channels in real time. Not just Twitter. Everything.

Respond. Not Just Report.

Most social tools show you what was said. We let your team respond, assign, resolve, and close the loop without switching tabs or platforms.

Publish With Intelligence

Plan, schedule, and publish across all social channels. See performance data alongside your content calendar. One platform, not three.

AI That Understands Context

Sentiment, intent, urgency, and topic detected automatically. Your team acts on what matters, not noise.

Analytics Beyond Vanity Metrics

Share of Voice, competitor benchmarks, engagement quality, and CX impact. Built for CMOs, not just community managers.

Social + CX on One Platform

Social care tickets flow directly into your omni-channel CRM. No copy-paste. No lost context. Full customer history in one view.

Crisis Detection Before It Escalates

Volume spike alerts, sentiment shifts, and keyword triggers notify leadership in real time. Act before it goes viral.

Most platforms stop at listening. Konnect Insights connects listening, engagement, publishing, analytics, and AI in one platform.

Set once. Run forever. Zero manual intervention.

Auto-Replies

Trigger responses for common queries with zero agent involvement.

Smart Tagging

AI classifies intent, product, and urgency on every inbound ticket.

Breach Alerts

Notify agents, supervisors, and managers before SLAs are missed.

Re-open Rules

Auto-reopen tickets when customers respond after closure.

Escalation Trees

Multi-level escalation with configurable delay and stakeholder routing.

Chatbot Handoff

Bot handles L0; seamless handoff to agent with full context retained.

Follow-up Scheduler

Auto-schedule follow-ups for pending or waiting tickets.

Reporting Triggers

Auto-generate and send reports to leadership on schedule or threshold.

AGENT EMPOWER

*Give every agent the superpower
of your best agent.*

29%

Productivity Lift

40%

Faster Handling

97%

SLA Compliance

AGENT EMPOWER

AI tools built into the agent workspace. Not a separate app.

AI Conversation Summary

One click gives the agent the full history, sentiment, and last resolution. Before they type a word.

Suggested Replies

AI drafts context-aware responses. Agent reviews, edits, and sends. Handling time drops by half.

Knowledge Base Assist

Surfaces relevant KB articles and past resolutions in real time as the ticket is being worked.

Sentiment Detection

Flags frustrated or at-risk customers instantly. Supervisors can intervene before escalation.

Next Best Action

Recommends the right next step based on ticket type, customer tier, and SLA position.

Agent Scorecard

Real-time performance metrics visible to the agent. Self-correcting, not just post-audit.

Less attrition · Faster resolution · Better CSAT · No additional headcount

SOCIAL LISTENING

*Stop reacting.
Start anticipating.*

- ✓ Real-time monitoring across 30+ sources
- ✓ Crisis alerts before escalation
- ✓ Competitive benchmarking live
- ✓ Share of Voice tracking

SOCIAL LISTENING

WITHOUT KI

✗ Brand mentions tracked manually

✗ Crisis found after going viral

✗ Competitor analysis done quarterly

✗ Social & CX in silos

WITH KONNECT INSIGHTS

✓ Real-time monitoring, 30+ channels

✓ Alerts before escalation

✓ Live Share-of-Voice benchmarking

✓ Unified: listening + care + publishing

From customer conversations to C-suite decisions.

Real-Time
AI-Powered
CEO-Ready
No Analyst

Most platforms give you dashboards. KRC gives you intelligence.

Real-Time Brand Health

Sentiment, complaint hotspots, and brand health updated live
— not in weekly reports.

Competitive Benchmarking

Share of voice vs competitors. Know where you stand before
your board asks.

Crisis Alerts

Threshold-based alerts reach the CXO before the crisis reaches
Twitter.

AI Executive Reports

CMO and CX reports on demand. Ask a question. Get an
answer. No analyst needed.

LET'S GET STARTED

Three steps to your first win.

01

Requirements Call

1 hour. Your team maps the rollout. We bring the blueprint.

02

Pilot Setup

2–3 live use cases. Configured, tested, go-live in days.

03

Go Live & Grow

Config → UAT → Hypercare → Live. We stay with you.
